Introduction

The Speaking test comprises 3 parts and is conducted by an examiner for 11-14 minutes. This test is similar to an interview and thus the emotions attached to the test are also similar – jitters, scary, and anxiety. This is where the IELTS Speaking book comes in.

This book helps you to understand the unfamiliar, so let's dive in!

→ Part – 1

Most of part one questions are personal questions that the examiner will ask you to bring you into a comfort zone. These questions are sorted in terms of different personal information.

→ Part – 2

The second part consists of a cue card for which you will be given 1 minute to prepare and 2 minutes to talk. The questions in the cue card are addressed and a sample answer is given for the cue card.

→ Part – 3

Following the cue card are part 3 questions. Part 3 of the speaking book consists of **questions related to the cue card** you will receive. And so, these questions are found with sample answers below the related cue cards.

Vocabulary

Lexical resources are factors of assessment during the speaking tests. So, **below each of these topics, you will find a vocabulary section that contains words related to that particular topic** along with examples.

Sample Answers

1. Do you use headphones?

Yes, I use headphones on a daily basis while I work or study and also when I watch movies during my leisure time.

2. What type of headphones do you use?

As I have to multi-task and wired headphones tend to **intertwine** easily, Bluetooth or wireless headphones are my favorites. Although they are **pricey** compared to wired ones, they are cost-effective as well as hassle-free.

3. When would you use headphones?

Actually, I have two sets of Bluetooth headphones. One of them is an in-ear set which I use during exercising at the gym. The other one is an on-ear set which I use mainly for work, listening to music or movie-watching.

4. What do you use headphones for?

My headphones have a noise-cancellation feature which helps me focus on whatever I am doing. Secondly, in public places I can use them **nonchalantly** without disturbing others with whatever I am listening to. Moreover, as they are wireless, I do not have to hold my phone in my hand and use my hands to the fullest.

5. In what conditions will you not use headphones?

Using headphones continuously can be **detrimental** to our ears. So, I take breaks after prolonged usage. Also, I don't use headphones when I am in the kitchen or outdoors to be mindful of my surroundings and **thwart** accidents.

Sample Answers

1. Are you interested in watching TV advertisements or internet advertisements?

Honestly, I am intrigued by neither of them because they ruin my concentration while I listen to or work on something. But, as I mostly use the internet for study/work or to **respite** from my hectic life, I am more **conversant** with internet advertisements.

2. What kinds of advertisements do you dislike?

All kinds of advertisements annoy me as they create a disruption in the activity I am engaged in. But, I am mostly irritated by junk mails and website pop-ups as they block essential information and I miss them out.

3. Are there many advertisements in your country?

Certainly, there are multiple advertisements for myriads of products and services throughout all cities and villages in India. They appear all over the place, from the streets to social media, with a high density. For example, there are a multitude of colorful billboards stuck on the street side wherever you go.

4. Why do you think there are so many advertisements now?

I guess it's due to the benefits of the companies. To begin with, advertisements are the easiest way to reach customers to entice their attention to a particular brand or product. From that **tantalizing** information, customers will be able to choose an appropriate one. Besides, it also plays a paramount role in the marketing strategy that the company applies to lure customers.

5. Have you ever bought something because of its advertisement?

Earlier, I used to be enticed by the sale advertisements of various e-commerce websites like Amazon and Myntra, which resulted in lots of unwanted shopping and turned me into a shopaholic. Fortunately, now, I have been able to control my craze after getting **an earful** from my mother.

6. Do you want to work in advertising in the future?

Although advertisements bug most of us, it requires a lot of creativity and research to make them comprehensible and relevant to the contemporary time and market needs. Unfortunately, I lack that level of **ingenuity** and knowledge and currently, it would be a travesty to consider myself eligible for that field. But we never know what life brings us, and in the future, I might take up it as a challenge if given the opportunity.

Sample Answers

1. Do you enjoy your current stage of life?

Although every stage of life has its own trials and tribulations, they are also accompanied by certain benefits and uniqueness. So, even though my current stage of life is full of commitments and future endeavors, I also enjoy the **camaraderie** of my partner, the accolades of my colleagues and the eternal love of my parents.

2. In what stage of your life were you the happiest?

I used to miss my nonchalant childhood days. But now that I have attained maturity, I think I was happiest during adolescence as I had the best days of my school life, opportunities to learn unknown things, face untried challenges and also the freedom of being an adult without carrying the load of liabilities of adulthood or the **infantile** errors of childhood.

3. Which stage of your life do you think is the most important?

In my view, adolescence is the most critical stage of a person's life as it is the turning point and can make or break the blossoming of life. In other words, this is when we leave behind the insouciant days of childhood and are on the verge of being accountable adults. So, everyone needs appropriate direction and care, without which they can fall prey to peer and societal pressure and easily be led astray.

4. What's your plan for your next stage of life?

I intend to pursue better job opportunities and create a niche for myself. Apart from my career, I want to keep my parents happy as much as possible, explore new places and relish the comradery of my close friends and my partner.

In my country, elders hold a respectful position in society.  IELTSMaterial.com

3. Have you ever received a confusing text message?

Yes, I have received a message that **flummoxed** me to the core. My friend and I planned to go out for a movie. Therefore, the corporate communication or essential instructions should be rendered on a phone call rather than an SMS.

In every culture, certain concepts or rituals are fascinating and worthwhile. For example, in India, one can learn how to live a colourful and joyous life, to be united even when different, the concept of 'jugaad', and many such things. In the same way, I learned a few **riveting** things about Americans, one of them being their concept of individuality.

Although I have read about it in contemporary books or heard about it in interviews, I didn't pay much attention to it. Later, I met an American student

who had transferred to our university and discussed this. Then, I realized that it is very **pragmatic**. For instance, when one of our friends was celebrating his birthday, we demanded a treat. After a wholesome dinner, our American friend decided to split the bill among us. In the beginning, most of us protested, but gradually we acceded as he explained that paying for the food of ten people can be **taxing** for our friend, especially when he is not earning.

Honestly, many people in my country would find this idea very **narcissistic**. But, in my opinion, when an individual becomes self-sufficient, he/she can plan their future better without being dependent on anyone as well as help in the all-round development of the society. For example, it is like an unsaid rule among Americans that when a child, irrespective of their gender, becomes a teenager, they have to start earning for themselves. It not only makes them self-sustaining but also helps them realize the importance of money.

Being self-reliant does not mean **jilting** your friends and family or being egocentric. It just means being accountable for one's own actions and not being an obligation to someone. In fact, when a country has a huge population of competent people, it will definitely be a developed country.

Part 3 – Foreign Culture

The examiner asks you questions related to the cue card topic. You should speak in long sentences while answering part 3 questions, 4 – 6 lines.

1. How do you learn about celebrations that are related to your culture?

In our country, we have **eclectic** kinds of celebrations in different parts of our country throughout the year. So, I learnt about our culture from my parents and elders as the customs have been passed down from generation to generation. Moreover, I got to learn about the other festivities either from my friends, who come from various parts of the country or from social media.

2. What do you think are common celebrations all over the world?

Celebrating special religious days like Christmas and New Year has become predominant with the advent of globalization. Other than that, people all over the world also **commemorate** meaningful days like Mother's Day, Father's Day, Friendship Day, etc., to communicate their fondness and appreciation towards their cherished people.

3. Do you think we should follow our culture and traditions, and why?

Every culture has its own traditions and rituals that root them in its own people and place. Therefore, in my opinion, it is necessary to follow or at least be aware of those conventions. Our culture is a product of life values, sacrifices and practices followed by ages of people. Therefore, they not only help us to **congeal** our individualism but also nudge us to know our past and march towards our developing future proudly.

4. How do you react to spending a lot of money on celebrations?

In some cases, I think spending money is a part of commercial development as many people earn their livelihoods from them. For example, in India, during any puja celebration, pandals are **embellished**, and food stalls are set up. This helps the decorators and caterers acquire funds through their respective vocations. But, the amount of money spent and wasted on **sumptuous** intimate extravaganzas like weddings, birthdays, etc., is sometimes not justified. Instead of ordering extra food and wearing pricey clothes for only one day, we could offer food and clothes to those who really need them.

Sports have a long history in India and cricket is undoubtedly the most favored sport in the country. This trend has recently changed as sportspersons from different fields are **partaking** in various world competitions and making a mark. Currently, one of many highly regarded sports celebrities in India is Neeraj Chopra. He is an Indian track and field athlete, the reigning Olympic Champion in the javelin throw.

At the young age of 12, Neeraj Chopra weighed a hefty 90 kg. Even though he was never interested in athletics, he began training to stay healthy. It is only because of his commitment and perseverance in attaining his goals. He also

has distinct attributes and **robust**, commendable qualities that aided his triumph in the sport.

Chopra was the first Indian track and field athlete to win the IAAF global U20 championships in 2016, when he recorded a world record throw of 86.48 meters, making him the first Indian athlete to do so. He has also won several medals in other events. For example, he **vied** in both the 2018 Commonwealth Games and the 2018 Asian Games, acting as the flag bearer in the latter and winning gold medals in both. But, he became a household name after representing India at the 2020 Olympics and coming home with a gold medal. Recently, he participated in the Commonwealth Games 2022 in Birmingham, UK, but had to pull out of the finals due to an injury.

He is one of just two Indians to have won an individual Olympic gold medal as of 2021, as well as the youngest Indian Olympic gold medallist in an individual event and the only one to win gold on his Olympic debut. He championed personal battles and background impediments to ace this momentous feat with **quintessence**. 3. Do you think children should imitate their idols?

To me, imitating means renouncing your individualism and might also lead to **abhorrence** when the role model does something unseemly. So, I think children should not be made to **emulate** anyone, be it their parents or any public figure. 4. What influence do popular stars have on teenagers?

With the increase in social media usage, youngsters are exposed to various occurrences and sensations from an early age. As a result, teenagers tend to admire and mimic the celebrities they like. 5. Do you think popular stars have more freedom or less freedom?

Being a popular celebrity comes with lots of cons, the leading one being a lack of privacy and freedom. They are followed everywhere and every minute detail of their lives is posted on social media, which in turn becomes **hearsay** and news to the public.

It is universally known that with age, people acquire more experience and knowledge about life than their younger counterparts. As a result, there is a lot to learn about valuable skills and life lessons from older people. Apart from many other skills that I ingrained from my elders, one crucial skill I retained was the concept of 'recycle, reuse and repurpose'.

Growing up, I was very close to my grandmother. Every year, I used to spend my summer vacation with her and that's when I learnt various skills from my exceptionally **adept** grandmother.

She had multiple ways to use this **utilitarian** principle to reuse and recycle everything in her home. As she cooked her food, she never threw away the

scrapes of fruit and vegetables; rather composted them and used them as fertilizers for her garden plants. Also, she never disposed of glass jars and used them to hold items like spices, tea, lentils, etc. Moreover, she would never discard **outmoded** clothes and would sew these pieces together to make exquisite curtains, quilts, tablecloths, etc. She kept busy with these activities, made old card boxes into fun toys, and turned broken furniture into tubs for the plants. My main learning experience was observing her and assisting her with her **refurbishing** undertakings. Consequently, when I grew up, I began executing her ways in our house.

Honestly, being indebted to my grandmother is an **understatement** for whatever invaluable aptitudes she familiarized me with. What she taught me so many years ago has become the imminent need of the hour. So, I am elated that she made me capable enough to take the initiative in saving our planet.

I've always been a huge music enthusiast. I enjoy listening to music because it lifts my spirits after a hard day filled with work and studies and gives me the energy to keep going. Depending on where I am, who I am with, and how I am feeling at the moment, I listen to a wide variety of music, from Jazz to Rock. I'm going to tell you about "Hello," one of my favourite songs.

In life, at various stages, we lose connection with people and even our own selves. So, this song is about experiencing that heartbreak and reconnecting with those who have passed away or abandoned us. When compared to the music, the words' profound meaning evokes an eerie sense. The song, a single that recently achieved **platinum status** this week, belongs to the pop genre. It is

performed by UK native Adele, a well-known performer on the global music scene. Despite the fact that her albums have been quite successful, she has managed to keep a relatively **low profile**. I am quite proud of my extensive collection of her recordings.

The song has been viral from the moment it came and has become the **talk of the town**. It has topped the charts for weeks and has got millions of streams on music sites. The minute I heard Adele's voice, I was hooked and totally blown away. I've put the song on repeat ever since.

I am keen on the song for a number of reasons. First, it was her voice that struck me, which is incredibly soothing and has a nice warm quality to it. Actually, while walking up to the room, I got a call from my colleague and hence I asked my parents to move forth and I shall follow.

After the call ended, I could find a trace of them and lead myself to a room full of strangers. Since the gathering was supposed to include my extended family as well, I sat there among them with an unnatural grin.

The conversation that followed afterward had no relevance to me. I couldn't find a single strand to hold that could make me interested in that conversation. Puzzles are a part of almost everyone's childhood. These brainteasers are a **riveting** and refreshing way of diverting our minds. A similar experience of solving a puzzle that I would like to talk about is the Rubik's Cube. The Rubik's Cube is probably the most recognized puzzle around the world. It is difficult to find an individual who hasn't tried their hand at solving a Rubik's Cube. This particular puzzle comes in the form of a plastic cube that is overlaid with multicolored squares on every side. The objective is to twist and turn the cube and **cumulate** all the same-coloured squares on each side or face.

The most intriguing characteristic of this puzzle is that it can be solved in a matter of seconds if the player can figure out all the moves accurately. On the other hand, this exact feature has a **tantalizing** effect on players, because, in a rush to solve the puzzle as quickly as possible, players often twist and turn the cube in the wrong direction, making it even more **perplexing**.

I remember distinctly when my mother brought me a Rubik's Cube as a birthday present. Initially, I had no clue how to go about solving this puzzle on my own. I would spend hours twisting and turning the cube, making the colors even more jumbled than they were before. Eventually, I managed to solve the puzzle after several days and was **ecstatic** at the fact and showed my parents the solved Rubik's Cube.

I **abhor** taking medicines generally and taking them for **paltry** issues and mild health inconveniences is not what I usually practice. However, there was a time when I became quite **lackadaisical** with a fever that I got after taking my vaccination for Covid -19. The post-vaccine symptoms took a toll on my health not because of the vaccine but because of intestinal **inflammation** that I came to know later.

After bearing the pain for some days, I finally decided to get myself examined and the doctor confirmed that it was not due to the vaccine symptom. Instead, I had Colitis due to which there is an inflammation in my intestine wall, and

hence the pain. So, I was **recommended** medicines and routine checkups every third day.

Actually, after getting my vaccination for Covid-19, I was told that I could expect mild symptoms post the vaccine as the immune system gets activated and charged up as a reaction to the constituents of the vaccine. However, little did I know that under the pretext of the symptoms, I would be brushing my intestinal inflammation aside. On the stipulated day, I got my dose and at night, I had a mild headache and a slight fever. The next day, I felt a severe headache and pain in my intestine, which I thought would be a cascade of symptoms I was going through, so I didn't take any medicine. However, my situation deteriorated with no fever or headache but an excruciating pain in my intestine due to Colitis. Opinions tend to get modified often and that keeps on altering every time a new **perspective** comes into the picture. One such incident where my preconceived **notion** was changed upside down was on my 16th birthday.

Until my 16th birth anniversary celebration, I believed that true **ebullience** and vitality come only when we celebrate an occasion in the grandest way possible and that throwing **lavish** parties was synonymous with real joy. I used to celebrate each of my birthdays in the best possible way as per what a typical teenager would think and want to celebrate as.

 IELTSMaterial.com

Then on my 16th birthday, due to certain **circumstantial** prevalence, I couldn't actualize my plans to celebrate the year of 'sweet 16' in the way I imagined it to be. I still remember how crumpled my emotions were and how disconcerted I was until my parents took me to an orphanage. That was when my definition of contentment was changed and a film of pseudo-happiness was denounced.

My parents bought lots of gifts and until we reached the orphanage, I didn't even have a shade of the idea for whom those gifts were being bought for. The next moment I vividly remember was the wide grin and the sounds of chuckling coming from the beautiful faces of those underprivileged children. I was so contented and overwhelmed with emotions that I couldn't hold myself to stay and play with those kids for the rest of the day and that indeed was a moment of epiphany for me. My friends and I planned a trip to a hill station 200 kilometres away from the city I lived in. However, that trip became very searing to my ears because of the younger brother of one of my friends. Five people went on that trip, and I took the car's back seat. The little boy urged me to sit with him, to which I happily

agreed. However, little did I know that the boy would become a matter of **irk** for me.

The boy started talking about all the animated series and animes that he had seen so far and wanted me to talk about them with the same zeal. Unfortunately, I didn't even have an idea about the ABC of those series. Sample Answer

An apology can work wonders and it is one of the best ways to **rectify** one's mistakes or misdemeanors with someone. I remember I had a minor **fallout** with one of our school prefects back in the days, and we were at loggerheads for over a week. However, his apology was enough to call it a truce and to placate the hard feelings we shared.

In our school, there was a provision for making prefects for every house we had, i.e., red, yellow house, etc. I was the prefect of the Red House and the guy named Thomas was a prefect of the Blue House. Thomas and I shared a good bond and were very **amenable** to each other. One day he planned to go absent

from the annual function of our school and wanted me to miss it as well so that both of us would be at the harsh receiving end of the slander and **chide**.

However, I denied his plans, so he had to come to school as well. After that, we were at tiffs for almost a week until he realized how silly it was on his part to miss the function on such an important day and, above all, wanted me to strike a chord with him. He apologized for his conduct and I happily accepted that.

He came to me, smiled, and said sorry for all he did. As he accepted his mistake, I showed no sign of rigidity and accepted the apology. I felt good about the situation, which made our bond stronger than ever. We never turned back again to any resentment and enmity toward each other and our friendship **emboldened** so much that we still are friends.

Sample Answer

I am an **ardent** reader and have read a significant number of books so far. I believe one gets to know and learn about a lot of things as meaningful and priceless insights are **imparted** through a well-written book. Talking about the book, which, apart from being an enriched source of knowledge, became my go-to partner is the book named 'Laws of the Spirit World'. I never thought of reading this book. However, while surfing the internet for some spiritual content, I came across this **prodigious** book as I have a **propensity** for spirituality.

I have always been spiritually inclined and philosophy and the way of living have been one of my favorite subjects. This book took that zeal and exuberance

towards the art of living to an altogether higher level. It talks about the essence of living and that all of our actions are watched over.

Humans are their own guides and they do not have to look for somebody else to guide or direct them if they pay attention to what their conscience and subconscious mind say.

I read this book as I found the reviews and ratings on a positive note. It is a critically-acclaimed book and I believe all those rave reviews and amazing ratings its readers gave were all worth it. At any time, whether good or bad, this book comes to the fore and boosts you up and revitalizes your esteem.

At times, one might feel **dejected** or might go astray from a good path in life. In such a scenario, this book works as a leash to bring one to the optimistic trajectory again by blowing wisdom and enlightenment in one's soul. Hence, as many times I read the book, I never feel as though I have already read it quite a lot of times.

Sample Answer

These days, there is a **conventional** idea to buy newer models instead of getting the **obsolete**, broken ones repaired.

However, just a few weeks back, our refrigerator broke down. Fortunately, it was still under warranty; thus, we didn't have to replace it. All of a sudden, it **ceased** to work. We tried plugging and unplugging it but to no **avail**. Initially, we considered getting the socket checked as there could have been an issue with it. But when I plugged my phone charger into the socket, it worked. That's when we knew the refrigerator was broken. Not sure, but it could have been because of the voltage **fluctuation** as it rained cats and dogs last week.

 IELTSMaterial.com

We had bought this machine only a couple of months back. Thus, we dialed the company and scheduled a technician's visit. Upon arriving, he evaluated the situation and declared that the main circuit was burnt, which caused the fridge to break down. The good thing was he came equipped with all of the necessary parts. So, without any further ado, he replaced it.

The feeling was definitely unpleasant. Whenever something breaks down in the house, it creates an unwanted ruckus. And, that's what happened that day. Most of the food got spoilt because of this breakdown. However, once it got repaired, we received an official apology email from the company, which was indeed a good gesture from their end.

We appreciated the quick and prompt services provided by the company.

1. Are IT-related jobs valued more by society?

I don't think that they are valued more or less in comparison to other jobs. However, the **magnitude** that IT jobs hold has increased lately with our increased dependence on technology.

2. Is the quality of products worse than before?

I agree with the fact that the quality of products has **degraded** in recent years. I can claim it from my personal experience. The equipment and machines that my parents bought, be it an air conditioner, refrigerator, or anything of the sort, lasted for years altogether. However, when I purchased the same equipment and machines, they didn't work for more than four years at a stretch. I think the technology is becoming **intricate**, but that has taken a toll on product durability.

3. What kinds of things do people like to repair by themselves?

I think DIY videos and articles available on YouTube and Google have made it possible to repair anything and everything ourselves. Recently, my mom fixed her sewing machine by watching a YouTube video. I have fixed my mobile phone and laptop many times by just searching about the issue and finding a quick fix.

4. Why do people like to get their mobile phones repaired in specialised stores?

I think the main reason is that they don't want to void the phone's warranty. Most of the companies clearly mention that if the phone is opened by a non-registered technician or store, the warranty would not be applicable. In my opinion, this is just another **stratagem** by companies to ensure that they can charge people heavily for parts, which could be repaired cheaply otherwise.

In my lifespan, I have received a myriad of free things. However, one of them that I would like to share here is when I received a free cup of coffee in Starbucks. The occasion was my birthday.

Completely clueless, I randomly visited Starbucks in September – my birthday month. When I reached the counter to pay for the coffee, the salesperson told me that I had a free coffee due as it was my birthday month. Thus, the order was completely free.

I was **stumped** but equally excited. Upon inquiring about the type of coffee and the customizations, they said I could order whatever I wanted. So, taking a different track than usual, I ordered a mocha with whipped cream.

So, this one time, when my grandfather asked what I wanted to be, I said that I wanted to be Noddy in a jiffy. Just a few days later, on my birthday morning, I saw a large gift-wrapped box in my room. I wanted to open it that instant, but out of the blue, all my family members started to sing a birthday song.
